

# Mumin Asaad

Associate Software Development Engineer

## WHO AM I?

For a developer passion is the main motivator to reach the highest potential, with my passion towards the technology at the earliest possible time, created the atmosphere to be motive and hope to reach the highest available knowledge possible, as we know knowledge is key part in a developer's life cycle, "The more I know the better I am". As for the time passed, I ended up currently in SEDCO FZCO, one of the biggest CEM companies in the world, in which I help in developing one of its biggest products CVM. I started my journey in the career as a Quality engineer in STS company, then I continued to my career to start my development journey in a small company that had a few developers that used to create special sites and programs for the usage inside its working area, this company is called DOT, I passed a few months there and then realized the potential of .Net Framework, and had the opportunity at SEDCO FZCO which I couldn't refuse, so my journey started in SEDCO and still continuing to challenge me every day...

## WORK EXPERIENCE

Present  
October 2016

- **Associate Software Development Engineer**  
At SEDCO FZCO  
As my progress continued to impress under CVM team, and the increase of my knowledge, I reached a new level which is the association.

October 2016  
June 2014

- **Software Development Engineer**  
At SEDCO FZCO  
I was responsible for developing CVM product, this development required knowledge in .Net framework, especially in WCF, WPF, Windows Forms, ASP.Net, HTML, JS, CSS, and other technologies.

June 2014  
March 2014

- **Java Software Development Engineer**  
At Distributed Oriented Technologies DOT  
With the little knowledge in development that I had, I work in developing special web applications for specialized needs, with multiple customers using J2EE technologies.

March 2014  
January 2014

- **Quality Engineer**  
At Specialized Technical Service STS  
Worked in a team of quality engineers to develop special solutions for bank, my work was just as trainee so it was mostly learning.

## WHY ME

As my background, I am four year experienced software developer, worked at STS and currently in SEDCO, I love what I do and I would love to improve myself at it.

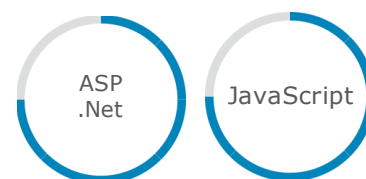

Working in STS gave me the insight of founding the errors before happening and producing mature code, after that the work at SEDCO improved me in business wise, learn to communicate with partners and customers, which are a plus in my career.

Knowing C# and VB.Net is crucial in ASP.Net development which I expertise most of the last four years, and I obtained knowledge in SQL and in MS SQL Server, which was a great application that is used in our product which is CVM.

With this knowledge I have and the hard working ability that I have, I think I am the man for this job as long as you give me the opportunity to work and improve myself with challenging work

## SKILLS

C#	●●●●●
VB .Net	●●●●●
WCF	●●●●●
